Create new Task Overfill Check:

Delete:

The screenshot shows the DisasterReliefHQ dashboard. At the top, there are navigation tabs for 'Dashboard', 'Tasks', and 'Volunteers'. The user is logged in as 'Coordinator: Jawad Ahmed'. The dashboard features four summary cards: '1 ACTIVE TASKS' (lightning bolt icon), '1 CRITICAL TASKS' (red circle icon), '6 REGISTERED VOLUNTEERS' (people icon), and '2 COMPLETED TODAY' (checkmark icon). Below these, the 'Tasks' section is visible with filters for 'All', 'Critical', 'High', and 'Medium'. There are three task cards: 'Search & Rescue Sector B' (Critical, Pending, 0 assigned), 'Shelter Setup at Central Park' (High, Active, 1 assigned), and 'Water Purification Station' (Medium, Completed, 0 assigned). An 'Available Volunteers' list on the right includes Sarah Mitchell, James Rodriguez, Altha Khan, David Chen, and Abraham John, each with their role and a 'First Aid' button. A '+ Add Task' button is at the bottom of the tasks section.

Assigning to task:

This screenshot shows the same dashboard after a task assignment. The '1 CRITICAL TASKS' card now shows '0'. The 'Shelter Setup at Central Park' task card now shows '2 assigned' and a dropdown menu is open, listing 'Abraham John — First Aid' and 'Ibrahim Imlaz — Medical, Security and Disaster'. The 'Available Volunteers' list remains the same. The '+ Add Task' button is still present at the bottom of the tasks section.

Phase 2:
No time for screenshots but implemented.
